

PRESS RELEASE

Al Tenbusch of Tenbusch, Inc. recently announced that a patent has been granted in Germany for the Tenbusch Insertion Method™ (TIM™) of trenchless pipe replacement. The TIM™ System is a patented process that replaces sewer, water, and other underground pipelines with new rigid pipe products. This technology replaces pipe at approximately one foot per minute, without percussion, while using small entrance and exit pits. Tenbusch, Inc., manufactures equipment for use with the system. This technology allows for a variety of pipe products to be used, in different lengths and diameters. For more information contact:
